

BE IN CONTROL WHEREVER YOU GO.

InfoHub[™] wireless monitoring tells you what you want to know about your generator – when you want to know it. Using your computer, tablet or smart phone, standby generator owners can instantly check their generator's system status from home or away.

Monitor standby generator status, track utilization, and be aware of any generator maintenance needs before your next power outage.

Receive emails and text messages on your standby generator's performance.

Set-up standby generator repair by sending maintenance notifications directly to your servicing dealer.

Smart cellular-based system provides broad coverage and a reliable connection to your generator.

InfoHub wireless monitoring takes protecting your home and family from power outages to the next level.

How it works

InfoHub constantly monitors the signal from your standby generator. When the generator's status changes, InfoHub instantly sends an alert to your email or phone.

BRIGGS & STRATTON[®]
TECHNOLOGY

Custom web platform view

User-friendly display makes it easy to monitor your generator.

- Monitor generator status by logging in or through text message and/or email alerts
- Track generator utilization
- View status and locations of multiple generators

Text message and/or email alerts

Pick and choose what types of notifications you want to receive:

- Generator maintenance or service notifications
- Change in generator status from utility to standby power
- Maintenance reminders

Or you can send generator maintenance alerts directly to your servicing dealer for hands-off repair and trouble-shooting.

Compatibility

InfoHub is designed to work with any Briggs & Stratton® standby generator as of August 2005*.
